

Kamile Samusiovaite

Vilnius University 1st year
software engineering student.

EXPERIENCE

Student

I pay special attention to programming, therefore I study computer software engineering at Vilnius University. For now, I program in C/C++ programming languages. However, I extremely want to improve my skills with others programming languages as well. I gladly accept challenges and believe that I can be a great specialist in this field in the future.

Dear Manager,

I am Kamile Samusiovaite, a first-year software engineering student at Vilnius University, and I suppose I am noteworthy candidate for the position of junior lever programmer. I had long thought I would like to work as a programmer and while studying I realized that this was my real vocation. Your proposed job corresponds to my abilities: I have a good basics of the programming language: C/C++. I study programming at university, I seek additional knowledge by reading books for programming. I can use other Microsoft Office programs well, I can also speak English.

I am confident that my practical experience in the field of programming and the knowledge gained during my studies will allow me to professionally perform the tasks of your proposed job. I was very interested in your job offer, so I would definitely spare no time for this job. I am ready to take on all challenges and continually improve in this area. I am also able to work in a team, quickly adapt to the environment. Therefore, I strongly believe that I could be a part of your team.

I have no doubt that with my acquired knowledge and dedication to always learning, I can be a useful specialist to their time. I look forward to the opportunity of a personal interview to discuss the needs of your company and the results you would expect from me.

I hope you were interested in my candidacy. I look forward to your reply.

Thank you in advance for your time,

Yours sincerely,
Kamile Samusiovaite
